

Hazardous household waste

Hazardous household products are collected once a month in housing areas.

On the backside of your trash schedule you'll find a list of trash pick up locations.

Please bring all your hazardous products to the Hazardous Waste Pickup Vehicle.

If you miss the vehicle, bring your hazardous products to the Hazardous Waste Storage Facility at Bldg. # **8468** during office hours (Mon-Wed 8:00am-3.30pm and Fri 8:00am-12:00 am).

For further information regarding hazardous products call the Hazardous Waste Storage Facility, DSN: **485-6858**

Don't leave hazardous products unattended due to danger for humans especially for kids, who often don't know the dangers of these substances.

General information

The **trash pickup schedule** is distributed to your mailbox. You can also obtain the schedule at Self Help Bldg. #8218.

For you it is easy to get rid of your waste. But for us your waste is difficult and expensive to dispose of.

The disposal cost are calculated by weight. To reduce disposal costs we have to reduce the weight:

- Sort your waste (paper, glass, metal-cans...) and dispose of it in the appropriate containers at the recycling islands.
- **The recycling yard is located at the waste SORT center building #8461**
- Don't throw your regular trash into the other bins. These bins are for recyclables only.

Glass and metal wastes are **valuable** resources. For these waste streams the USAG Baumholder gets money from disposal companies.

Always remember:

The more money we save for disposal costs, the more money can be spent for the community.

The What-To-Do-With-Your-Trash Guide

For additional information please feel free to call the Waste SORT Center

DSN: 485-6478 or 485-8147

Regular household waste

This kind of waste is disposed of in the **black containers**.

Please dispose your waste **in** the container.

Don't throw your hazardous products into the regular waste trash containers.

If the regular household waste container is full, don't throw your waste into the paper container. Leave it **next** to the household waste container.

Paper and Cardboard

Paper and cardboard are recyclable resources.

Therefore, paper and cardboard are disposed of separately from regular household waste in the **blue containers**.

Due to its weight paper in household waste increases disposal costs for regular household waste.

Paper containers will be emptied every Wednesday.

Bulk trash

Bulk trash will be picked up twice a week.

In Barracks Areas: Tuesdays and Thursdays.

In Housing Areas: Mondays and Fridays.

For large items (couches, fridges) call DSN: **485-6478 or 485-8147** to make an appointment for pickup.

Small items (TVs, BBQs) can be delivered directly to the waste SORT center .

Metal cans

Metal cans are recyclable resources.

Therefore, metal cans are disposed of separately in the

containers with the yellow lid.

Due to its value, the Garrison gets money for recycling of metal cans.

Glass bottles and jars

Glass bottles and jars are recyclable resources.

Therefore, glass bottles and jars are disposed separately in the

containers with the red lid.

Due to its value, the Garrison gets money for recycling of glass bottles and jars.

Glass recycling also reduces the weight of regular household trash.
